

Oliso Auto-Lift Steam Iron

Price: £61.29 (inc 17.5%vat)

No more burnt ironing board covers or garments thanks to the patented Auto Lift technology.....

A Revolutionary New Electric iron which lifts itself up when left flat on a surface, removing the danger of burning clothes. Here's an iron that's really 'cool'. In fact, we gasped in amazement when we first saw it put it down on the table, and right in front of our eyes it lifted up all by itself! Once we'd calmed down, convinced it was magic or levitation, we discovered that the secret lies in a sensor inside the handle. When you let go, the 'auto-lift' mechanism raises the stainless steel soleplate from the ironing board... hold the handle and it lowers back to the garment. How clever is that! It does this automatically, completely removing the danger of scorching your clothing or your ironing board.

- Choice of continuous or variable steam output, with steam 'burst' to remove even stubborn creases with ease.
- Polished stainless steel sole plate glides across fabrics for friction-free pressing of garments.
- Vertical steam option is ideal for refreshing curtains, dresses or suits.
- Auto-off function cuts power if the iron is left on its heel for eight minutes, or knocked over.
- Anti-drip feature looks after your delicates by preventing spitting.
